Hares: Neanderthal and Affrodesia
When? 03.09.00
Where? Foret de Versailles
Turnout? Too many

It was a long convoy to a long run. We bore some losses. But we didn't bore all the passers by who couldn't help noticing a large pack in funny t-shirts running past them on their Sunday walk. The forest of Versailles is full of them. It is also full of paths, most of which hare Neanderthal had us run along. Co-hare Affrodesia got to do the fun bits of setting the run, such as planting the beer on a peculiar platform. Most memorable part of the run was the several instances when Neanderthal told us that to get to the beer stop it would be not far or an extra 3 kilometres.

An extra 3 kilometres away it was the beer stop, but for the really energetic folk that extra 3km still hadn't been covered. There were a lot of sweaty people. At the circle Deep Throat saved the day by making sure Sans Clue's beer didn't run out, and the alien, finally recovered from the West Rhine hash, was completely ignored, except by Pimms. Newcomer: Flic the cute puppy. Cheers to GrabNuts and Platypussy for taking notes.
